

Fuji Spray 3 Stage Quiet HVLP Spray System

Lightly Used

Lists for: ~\$1000, Asking \$400

The Fuji Spray 3 Stage Spray System is supplied with the Fuji T-70 non-bleed spray gun with pattern control knob - the fan size is adjustable from small to large and everything in between (fully incremental). The benefit of non-bleed is that air only passes through the spray gun when the trigger is pulled resulting in less blowing around of shop dust and less paint buildup on the tip of the fluid nozzle. Obtain a professional finish with all known coatings.

The spray gun included with this package is the Fuji T-70 with 1 Quart cup.

The standard air cap set is the general purpose #3 (1.3mm) for fine finishing with lacquers, enamels, polyurethanes, latex, water-based coatings and more. Easy to maintain.

Perfect for professional or beginner.

This is an industrial-rated machine at an unbeatable price. Heavy-duty metal case with gun holder. Portable and powerful. Complete system includes the FUJI SPRAY 3 STAGE SPRAY SYSTEM quiet turbine,

What is included:

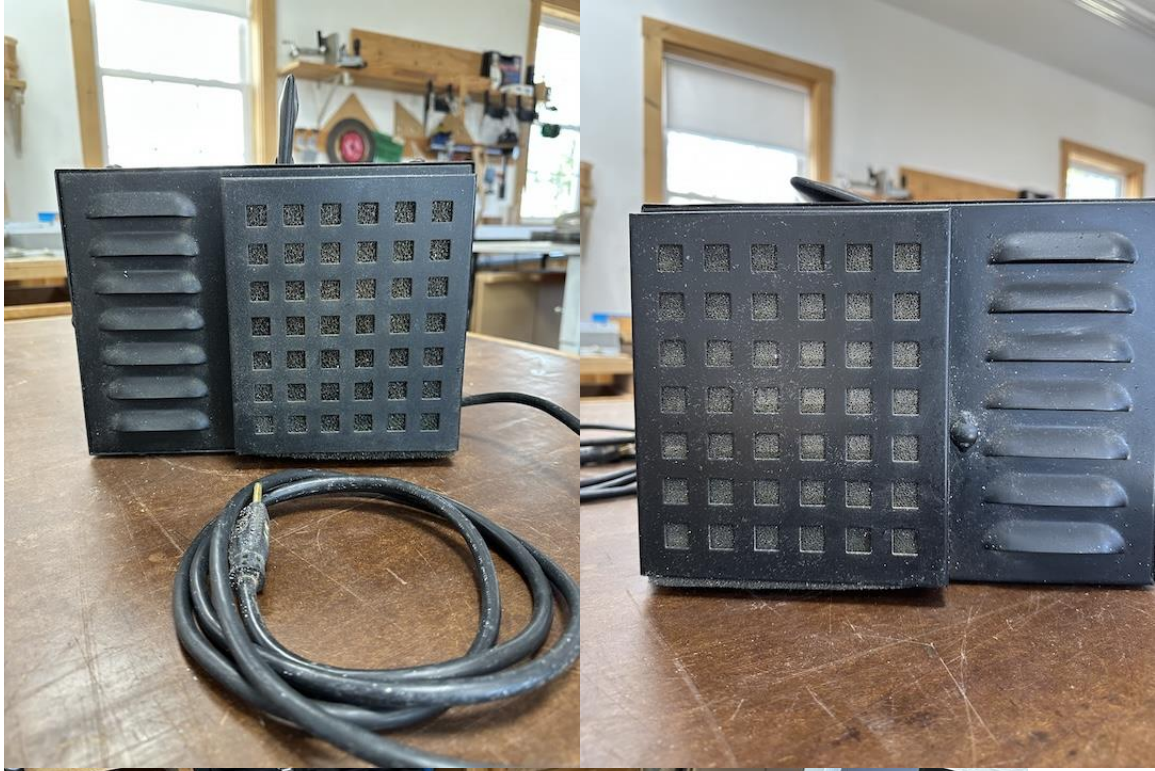

- Turbine
- 25ft Hi-Flex hose,
- T-70 non-bleed spray gun with 1 Quart cup,
- General purpose #3 (1.3mm) Nozzle and probe for fine finishing
- Thicker Nozzle and probe for thicker finishing materials
- Viscosity cup,
- Cleaning brush,
- Wrench and user manual.
